NTC successfully moved a monolith weighing 310 MT across 97 km in Tamil Nadu [Sirudhamur to Thandalam] on 26th May 2017. The stone was moved to the customer Saveetha University's site @ Thandalam. The biggest challenge was the approach road development at the loading point which was a remote quarry in Sirudhamur village. Over 1000 cubic metres of boulders, gravel and sand were used to lay the approach road leading to the colossal 310 MT monolith.

After the civil works were completed, our Project Lead Mr. Haran Pramoth supervised the loading operation where 6 nos., of 100 MT hydraulic jacks were inserted under the stone and loaded onto our hydraulic modular trailers. Twenty lines of VMT hydraulic trailers and 2 powerful 520 HP VOLVO Prime Movers were engaged in this challenging project. Our team had to navigate through three critical turns where civil works such as median removal, road strengthening and development were made prior to start of the project.

Permission was obtained from law enforcement and other local authorities to facilitate smooth and timely execution. Through the meticulous planning of our experienced team, the project was successfully completed within the committed transit period of 3 days and delivered to customer premises on May 26th, 2017.

Project details:

Project Name	Monolith for carving statue of Lord Muruga
Scope of work	Loading, unloading and transportation of 310 MT stone
Customer	Saveetha University
Dimensions	12.1 m X 4.26 m X 2.14 m
Tonnage	310 MT
Trailer	20 lines VMT Hydraulic Modular Trailer
Truck	VOLVO 520
Loading point	Sirudhamur Quarry
Unloading point	Saveetha University, Thandalam
Transit distance in km	97 km
